Frequently Asked Questions

What is surplus?

We buy closeouts, inventory overruns, mis-manufactures, and items whose time has not come. We can usually acquire these items on a one-time-only basis. When a surplus item is gone, it is gone. So if you see something you love, best get it now since we may not have it tomorrow. Our website is frequently updated with our inventory. If you see an item in our catalog, but cannot find it online, it means we have sold out of that item. If our stock of the item you have ordered is exhausted we will refund that portion of your remittance. When we can't find surplus, we may carry regular merchandise which we think those interested in learning and tinkering will find appealing, but only if we feel it is good quality at a fair price.

Can I return items?

Yes. We accept all returns without question and will either refund your purchase price or send you a replacement, as you chose. Returns must be made within 30 days of purchase. For complete details, please check the order form bound in the center of this catalog.

What forms of payment do you accept?

We accept Visa, MasterCard, Discover, American Express, checks and money orders. We are sorry to report that we cannot accept CODs, cash, stamps or gold. **If paying by check, please be aware that you are authorizing American Science & Surplus to use the information on your check to make a one-time electronic debit to your checking account. This electronic debit will be for the amount indicated on your check. If you do not have sufficient funds in your account, a returned check fee may be debited from your account. If you have any questions, or choose not to have your check converted into an electronic item, please contact American Science & Surplus at (888) 724-7587.**

Do you have a minimum order requirement?

We regret that the costs of doing business preclude us from processing orders of less than \$10.00 merchandise value (exclusive of shipping and handling). We will return orders of less than \$10.00 merchandise value.

Additional information can be found on the order form bound in the middle of this catalog.

Candles For Household Saints

We're not sure how the clergy feel about them, but for us, these novena candles featuring "secular saints" walk the line nicely between the sacred and satirical. Maybe they cross it but go ahead, cast the first stone. They're glass and wax, 8" tall x 2-1/8" dia, with colorful renderings of pop-culture "saints" on the front, just like their religious antecedents. The flipside has a prayer to the saint, their saint's day (actual birthday) and what they're the patron saint of. You pick: Bob Ross or Freddie Mercury. Made in the USA.

97807 F. Mercury Candle \$12.65/each

97808 Bob Ross Candle \$12.65/each

Radiometer

Another oldie but goodie. 5" high evacuated clear glass stand 3" in diameter at the top. A four bladed vane is balanced on a needle inside the sphere. Because opposite surfaces of the vanes are black and white, incident radiant energy is absorbed or reflected to a different degree. The result is a spinning vane. The brighter the light, the faster it spins. Simple, but compelling. Brief explanatory instruction sheet included.

3817 Radiometer

The Sands Of Time...

Gosh, we haven't watched our stories in ages. Anybody know what Luke and Laura are up to? Let us know. Meanwhile, check out these awesome sand timers! We can't really call them hourglass timers because they have (3) teardrop-ish clear glass globes instead of (2), giving them a modern—dare we say, contemporary—look. Top and bottom globes are larger, and the middle one doesn't fill if you're using it right. The units we tested were +/- 6% of the time. You pick: the 15-minute glass, measuring 8" tall x approx 3-1/4" dia with steel-blue sand; the 30-minute, measuring 9" tall x approx 4" dia with red sand; or the 60-minute, measuring 12" tall x approx 4-1/2" dia with goldenrod yellow sand. Ages 14+.

Neon Without The Gas!

This electrical wire from American Crafts™ looks like neon tubing, but it's actually lit with LEDs. You bend it into whatever message or shape you want, and it'll stay that way. Go for a 1950s retro diner vibe or something more contemporarily neonish. The single wire is approx 7 feet long x 3/16" dia and has a battery hold with an on/off switch for the (2) "AA" batteries you supply. It's not the brightest LED neon wire we've ever seen, but it's great as a high-light in darker conditions. You pick: blue or white.

51420 Blue Neon Wire \$3.95/each

51421 White Neon Wire \$3.95/each

A Time Saver?

You can't cut time in half, but with this ingenious 32" dia clock, you can fold time. It's our favorite foldable (and unfoldable) wall clock from the always-reliable Kikkerland®. In classic white, with a spare, Swiss train station design, the clock is portable for those times when you want to put time on pause. Folds down to 11" dia and pops open to full size instantly. Very lightweight fabric, with quartz movement that requires only (1) "AA" battery, which you supply. Take it wherever you go. Has black markings, a black border and an elegant lack of numbers, because you already know where they are.

51005 Foldable Wall Clock \$9.50/each

Ever wonder why they call a staple a staple? It's not "a main item of trade or production," as the word book defines it. We'll send you a package of (50) because you need them for your garden.

Original Slinky

Does anyone need to be told what a Slinky® toy is?? Okay, it is a very slack spring, 2-7/8" dia x 2-1/2" long, compressed. It will stretch out to about 5 or 6 feet long without deforming. That's the boring part. The interesting part is that it "follows" itself. Slosh it from hand to hand. Put it on the top step of stairs, flip the end down a step, and watch it walk down stairs, or down an incline (they can do it alone, but we recommend them in pairs). Believe us, no childhood (or adulthood) is complete without an original steel Slinky®.

Emergency underpants in a can. Says it all, doesn't it? Quite stretchable in a Tyvekish white fabric, "one pair fits most adults." Tiny but perfectly accurate, and the only pocket postal scale most folks will ever need. Stick your envelope in its alligator jaws, hold or hang it up and read the weight in grams (0 to 100) or ounces (up to 4) in increasing increments. Handy in the US, and very handy for travel to metric lands. Pretty much flat and approx 3" long in its vinyl pouch, it takes up virtually no room, costs next to nothing, and has no batteries.

In the lab or kitchen, these clear borosilicate glass mugs have a handle and lip and remind you that science is part of your every day. The smaller 4-1/2" 400mL one has graduations in 50mL increments and the larger 6" 1000mL one in 100mL increments with numeric markings every 100mL or 200mL accordingly; both with more room before you have to worry about spilling. Just Up To Rubidium

That'd fill this 9-oz ceramic coffee mug with the periodic table of elements printed on the side to about half a cup. It's printed in color on both sides, actually, in case you're left-handed. The atomic numbers and weights are a trifle small, but then they are atomic.

Hemostatic Heavem

Hemostats are the clamplike devices dangling from veins and arteries in melodramatic operating scenes. We rate them pretty good, but not fantastic. Hemostats look like little pliers. The jaws are relatively fine, with rounded tips. The inside faces are lightly serrated to get a grip on tubing or body plumbing. Great hobby clamps that can be worked into small areas. Fine heat sinks for electronics. Good hook extractors for trout fisherpeople. Excellent tubing clamps for flow-sensitive chemistry experiments. Size is approximate.

Scope Your Stethos!!

Stethos is Greek for chest. Indeed you can scope your stethos with this stethoscope, or your friend's or your dog's. But it works equally well for picking up any sound being transmitted through a solid medium. Listen to the air flowing through the heating ducts, the water in the pipes, the sounds of machinery, the termites munching on the floor joists!! The color does vary so we will select from what's currently available. We've had blue, teal, red, black, burgundy, green and purple, but there may be other colors yet to be seen! A great discovery device whether for biology or other pursuits. Not of professional quality, but not just a toy.

This stuff is imported from China, and is considered student grade, which is good enough for anything but the most exotic applications. Mylar Warmth

They have the look of something designed for the space program. They're mylar, a paper-thin shiny metallic sheet, that comes in handy when your car breaks down in winter, or when you're separated from your climbing group on the slopes of Denali. Barring that, they're also a perfect material for a do-it-yourself cold-climate Halloween costume—near impossible to rip by hand, but cut easily with scissors. There's no padding, so they wouldn't be too comfy on your bed, but they sure are warm. They both come folded about the size of a wallet. The Blanket is 52" x 82", the Sleeping Bag is 34" x 84".

Is That Length Flexible?

Remember those slap bracelets that swept the nation a few years back? This 18" long x 3/4" wide easy-to-read ruler is sort of like those in that it stays bent and then snaps open again, but nothing like those in that this is not a fashion accessory. Or is it? Until you decide on that, consider that, tool-wise, it has magnets on the end to keep itself shut, but also to attach it to anything metal. Has standard 1/16" markings with clear lines and large digits.

Erase Without Water!

This classic brick-shaped eraser is for dry-erase boards (or do you say "whiteboards"?), and although there's no mention of its ability to erase chalk (on a "blackboard"), it's made of felt, so we're thinking it'll do just fine if you ever have to literally wipe the slate clean. Until then, you can figuratively wipe it clean using whiteboards. Brick measures roughly 5" x 1" x 1", and comes with instructions, in case you forgot how to use an eraser.

The Fairest Of Them All

We'd say our price for this flexible mirror material is about as fair as you can get. For less than 8 bucks, we'll send you (9) 8" x 9-3/4" sheets of a reflective material we believe to mylar with a self-adhesive back. The idea is to make a mirror-like surface anywhere. We say mirror-like because this stuff has a little carnival feel to it. In other words, it's not totally clear. But it is fair, and when you need a reflective material, it's beyond fair—it's great.

50799 9 Mirror Sheets \$8.75/each

A Roll For Your Drawers

There's nothing worse than opening a drawer and hearing everything shift and slide all over the place. OK, sure, there are a few worse things, but man we hate that sound. This non-adhesive, soft, synthetic, grippy material brings the sliding to a halt. You'll get a roll of it, 12" wide x 144" long, and all you have to do is cut it to fit. Without glue of any kind, it naturally sticks to the bottom of your drawer. It's white-cream colored and sort of lacey, probably for extra grip. Great for kitchens, bedrooms, RVs, tool chests, garages, workshops, hobby rooms, man caves and she sheds.

98029 Drawer Lining \$3.50/each

Siiiix, Gold-ish, Riings!

You can't blame the original manufacturer for putting (6) gold rings in a package instead of just (5). If they'd have put (5) in there, they'd get nothing but jokes about the "Twelve Days of Christmas" song, which would be annoying. Rings are made of steel with a gold-ish coating, 1/8" thick x 9" dia, which means they're way too small for a lord to leap through but ideal for macrame, dreamcatchers, ring around the pin and more. Not suitable for French hens.

50480 9" Goldish Rings \$4.50/pkg(6)

3 Panels O' Probably Pine

The Mega Magnet

Paul went out to the warehouse and almost picked up a pallet jack with this monster 2" square 100-lb pull retrieving magnet from Magnet Source®. Painted red it stands 2-3/4" high with a 1" dia (5/8" ID) eyebolt screwed and bolted into the top, and has welded steel construction to protect and focus the ceramic magnets inside. Cut Your Stress In Half

This might be our most convenient stress-relief tool, a 2-3/4" dia x 1-1/2" tall foam half-ball in green with a simple ceramic magnet on the flat side. Stick it to the fridge, where it'll hold your grocery list, a photo or a few papers, and you'll always know where it is when it comes time to squeeze the bejesus out of it to blow off some steam. If you really give it the business, the magnet might pop out, but it's easy to re-glue. You'll get (6) squeezers, so you can give some to your equally frazzled friends.

A Real Grabber

Okay, it isn't the cheapest magnet in the warehouse - but we dragged John's 165 lb filing cabinet around the dock with this 4-7/8" x 1" x 3/4" ceramic magnet, we're rating it conservatively at 100 lbs of pull, and we think it's a bargain. It has a 6" bracket with mounting holes on 5-1/2" centers, plus a 1/2" ID eyehook bolted into the center of it. It's all set to troll the bottom of the lake next time your filing cabinet falls overboard.

Killer Magnet

Once upon a time, a copywriter put this little magnet next to his computer monitor and got really pretty, wavy, aurora-like effects. And then got a new monitor! Don't try this at home. Our shiny, silver-colored 1" x 1" x 3/8" neodymium magnet looks innocent, but is industrial strength, pulling something like 25 lbs with enough strength left over to erase all your credit cards. And wreak havoc with your monitor.

38694 Killer Magnet \$14.50/each

We're Talking A Lot Of Pull

Just off the truck (after we all got together and finally pried them free), these rare earth Neodymium Iron Boron (Ndefeb) block magnets have more pull than your maybor. Shaped like a rectangle, they measure approx 1/2" on each side and 1" long, with about 40 lbs of pull. Strong! Coated in a triple layer of nickel-copper-nickel for maximum durability and protection. ISO Certified. Br max: 14,500 Gauss.

Stick To It

Like your cousin the state senator, this N42 neodymium magnet has a lot of pull—an estimated 90 lbs on flat steel surfaces. Ideal for holding, hanging and retrieving objects. Measures approx 1-1/4" dia x 1/4" thick with an M6 eyebolt that has an approx 3/4" inner and 1" outer dimension and serves as a pulling (or hanging from) handle. Nickel-coated steel cup protects the magnet from damage, and concentrates the force on the magnet's surface.

97433 Hanging Neo Magnet \$9.50/each

Rock The Poles!

We just want to celebrate...this magnet. (Classic rock fans, you're welcome for the references.) This rare earth cylinder magnet measures 9/16" x 11/16" with a 5/16" x 3/8" slotted hole (we think that's what it's called) in the center.

It's a strong bugger at 10 lbs lifting power in the ends, and very shiny silver. Hole makes it great for attaching string to it and retrieving keys lost down the sewer or well. You know, when you lose your keys that way. Made in the USA. You'll get (1) hyper strong magnet per order.

49505 Cylinder Magnet \$3.50/each

Bear With Us

Mounting Animal Magnetism

You hear that? Like a deeply satisfying metallic clink? That's the sound of a powerful round mounting magnet in a focusing cup with a hole in the center uniting with the metal surface of your choice. The magnet is 1-1/4" dia x 1/4" thick and the hole is about 1/8" dia. We estimate 25+lbs pull based on the face our owner made trying to pull it off his file cabinet. Slide hooks or other hardware through for a powerful mount, which, let's be honest, is what we all want!!

For Walls, Not Skies

Don't use these super-cool FAA aeronautical charts to navigate the skies, because they're expired. Not long ago they were used for training and flight simulators. We have an assortment of random U.S. charts, and we'll send you a great one. They measure approx 58" x 20" but will vary depending on the area of the country they depict. Each is double-sided, color-coded and folded. We repeat: The charts are expired! Not to be used for actual aviation! Know what they're great for, though? Replacing your old Hendrix posters and beer signs, and telling the world you're a sophisticated adult with refined tastes. Since aviation charts expire every 56 days, like the yogurt in our fridge, we're going to keep getting new ones. So keep ordering. Great for techies, travelers and as the coolest wrapping paper anyone's ever seen.

Lazy Scott Bearings

Never seemed fair to nail the "lazy" tag so permanently on the "Susans" but that probably has no "bearing" on the issue. Also called turntable bearings, they are the square, flat ball bearing devices YOU bolt between two flat objects to achieve rotation. Like that spinning center section of a Chinese restaurant table. We had these in surplus once and they were quite popular. To our chagrin, we discovered they could be bought commercially for the same price. So we did. The 4" version is rated for a 300lb and the 12" (round) for 1000lbs.

Shear Monsters

These stainless steel tailors' shears are sized halfway between "Edward Scissorhands" and "my grandfather was a cutter in the garment district." At 12" long they're perfect for folks who do a lot of heavy duty snipping or are just tired of wimpy little scissors. And yes, please don't run with them.

Bored?

Then better check your bore. This tiny bore light, made for looking into barrels or other tight spots, measures 3-1/4" long x approx 5/8" dia with a single white LED. Includes a slide on right-angle fiber-optic head and a pocket clip. Take off the head and it's a nice mini flashlight. You add (1) "AAA" battery.

Clavicle Luminosity

We caught a great Clavicle Luminosity set last summer at Lolla, but we're not here to talk about music. This Farpoint® Flex Dual Detachable Neck Light & Flashlight gives us all the clavicle luminosity we need. It's a neck band that rests on your shoulders with a pair of adjustable, 3-3/4" long x 1" dia rechargeable (200)-lumen LED flashlights on the front. Lights swivel 360 degrees and have slide focus (from spot to flood). They're also detachable, which makes them great as pocket flashlights, and weatherproof with an IPX4 rating. Each lasts up to 2-1/2 hours on a full charge with included 600mAh lithium batteries and USB Type-C for fast charging. Now that we have this neck light, we can't wait for the new album.
